Notice on determination of cannabinoids in hemp and hemp products

ALS Czech Republic, s.r.o., is the holder of the Decision on Authorisation for Handling No. 63/2022, for import, export, storage, use, research, and analytical activities, in compliance with the Act 167/1998, on Addictive Substances.

Please note that as the samples supplied by you may contain substances from the group of tetrahydrocannabinols with a content higher than 1% and thus may fall within the scope of the Act 167/1998, we will treat all samples submitted for cannabinoid analyses as if they were an addictive substance until the analysis proves otherwise.

Please also note that if the analysis confirms a content of tetrahydrocannabinols above the legally permitted level, ALS Czech Republic, s.r.o., is under a reporting obligation based on the Act 167/1998. In those cases, the laboratory may also require submission of a valid authorisation for handling addictive substances, in accordance with the Act 167/1998.

I understand and acknowledge the information.
