

# PUF ADSORBENT MODULE TRAP

## ACCESSORY FOR SAMPLING AT EMISSION SOURCES

ALS CR provides on a routine basis for sampling teams the following PUF trap to collect semivolatile compounds from emission sources.

- Borosilicate glass (Duran)
- PTFE/ Stainless steel filter support
- Titanium plane filter holder (for filter 50 mm)
- Screw threads G3/4

### DELIVERY

The trap is delivered in tailored shaped box containing:

- Up to 10 traps in one travelling case
- Closing caps GL60 to seal PUF trap
- Sampling standards according to the specific required methodology in vial ready to spike
  - EN 1948 for dioxins and furans
  - EN 1948 for coplanar PCBs
  - US EPA 429/ISO 11338 for PAH

The PUF adsorbent module trap is ready to use and can be ordered with or without PUF.

PUF can be spiked directly in our laboratories prior to delivery, with the appropriate sampling standard, enabling an immediate sampling campaign.
